

Battersea Jacs Swimming Club

Developing policy

The club will monitor the results of policies in practise, in order to further develop processes to improve outcomes for all participants.

In order to complete this work the club will seek feedback from members, parents, coaches, volunteers and the facility operator, as well as communicating its findings to these parties.

The club will develop as robust a policy as possible within the constraints of Covid-19 legislation and developing knowledge in this area as well as implementing recommendations from Swim England.

It will be the aim of the club to facilitate as full a teaching and training programme as possible, and to expand this as it gains practical experience in the current, restricted environment.

All club policies and protocols will be regularly reviewed.
